Evening Routine Reset

A Calm, Predictable Flow for Falling Asleep Fast

Your nights transform when your evenings slow down.

This guide helps you lower cortisol, calm your mind, and enter sleep effortlessly.

RiseByNight

Why Your Evenings Shape Your Sleep

- Your brain needs predictability to enter sleep mode
- Evening stress keeps cortisol elevated
- Screens + bright lights delay melatonin
- A structured flow reduces time-to-sleep
- Calm evenings → deeper nights

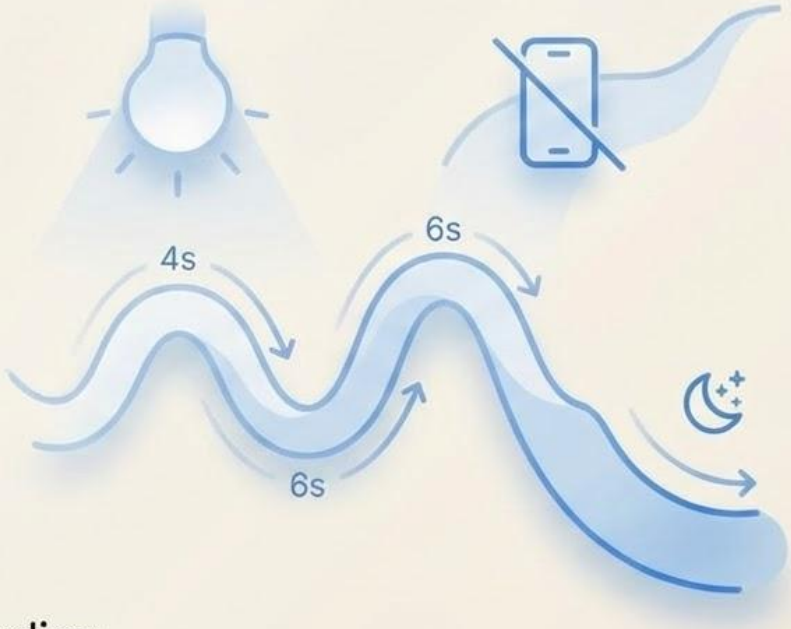

Your sleep begins long before your head hits the pillow.

RiseByNight

Your 20-Minute Wind-Down Script

Part 1 — Create Calm

- **Dim Lighting** (2 min): Switch to warm, soft light.
- **Digital Detox** (5 min): Notifications off; phone away.
- **4–6 Breathing** (2 min): Inhale 4 sec → exhale 6 sec → repeat 6–10 cycles.

This is your signal to the brain: the day is ending.

RiseByNight

The Cortisol Curve:
Why You Can’t Fall Asleep

- Cortisol should drop steadily after sunset
- Screens, stress & bright lights keep it elevated
- High nighttime cortisol = racing mind
- Lower cortisol → faster sleep onset & deeper REM

A calm night begins with a calm nervous system.

RiseByNight

Your 20-Minute Wind-Down Script

Part 2 — Release Tension & Clear the Mind

4. **Neck & Shoulder Release** (4 min): Gentle stretch to reduce tension.
5. **Calm Mind Reset** (3 min):
   - Write tomorrow's tasks
   - Or journal 3 calming thoughts
6. **Alignment Prep** (4 min):
   Ease into your pillow; relax jaw + shoulders.

A relaxed body and clear mind fall asleep effortlessly.

RiseByNight

Your Anti–Cortisol Evening Routine

- Keep lights warm + low after 8PM
- No stimulating conversations at night
- Avoid work after dinner
- Silence notifications
- Use soft background noise if needed
- Keep bedtime consistent

Bonus: Lower cortisol = faster sleep, deeper cycles, calmer nights.

RiseByNight

Pre-Sleep Detox Checklist — Environment (0–3)

- Lights: warm + dim only
- Noise: low or consistent white noise
- Temperature: cool room (17–19°C)
- Clutter: remove visual stress
- Screens removed from bedroom

Your environment should feel instantly calming.

RiseByNight

Pre–Sleep Detox Checklist — Behavior (0–3)

- No screens for 45–60 minutes
- Notifications off
- Light stretching done
- Breathing routine completed
- Zero stimulating activities

Bonus: Your behaviors teach your brain when to switch into sleep mode.

RiseByNight

Pre-Sleep Detox Checklist — Mind (0–3)

- Stress unloaded (journal / brain dump)
- Tomorrow prepared
- Mental noise reduced
- Jaw, neck, shoulders relaxed

Score Guide:

- 0–4 → Needs improvement
- 5–7 → Improving
- 8–9 → Sleep-ready

Bonus: A calm mind falls asleep quickly.

RiseByNight

Why This Routine Works

- Lowers nighttime cortisol
- Reduces overstimulation from screens
- Releases muscular tension
- Clears mental clutter
- Prepares your body for aligned, calm sleep

Bonus: Falling asleep becomes natural, not a struggle.

RiseByNight

Your Ideal Evening Timeline

- 90 min before bed: Lights dim, lower stimulation
- 60 min before bed: Screens off, phone away
- 30 min before bed: Breathing + stretch
- 20 min before bed: Wind-down script
- Bedtime: Alignment → calm → sleep

Bonus: Consistency builds effortless sleep patterns.

Your First Sleep Improvements

- Fall asleep faster
- Less evening stress
- Fewer racing thoughts
- Lower nighttime restlessness
- Clearer mornings
- More predictable sleep schedule

Bonus: A calmer evening = a calmer night.

RiseByNight

Evening Transformation: Before → After

Before:

- Racing thoughts
- Screen overstimulation
- High nighttime cortisol
- Struggle to fall asleep

After:

- Calm, predictable evenings
- Lower stress + slower mind
- Faster sleep onset
- More refreshing nights

Bonus: A small routine shift creates a big nighttime transformation.

RiseByNight

3 Micro-Habits for Faster Sleep

- Warm Lighting Only: tell your brain “night mode.”
- No Phone in Bed: remove stimulation + stress triggers.
- Light Tension Release: shoulders + neck relaxation.

Bonus: Tiny habits → massive improvement in sleep onset.

RiseByNight

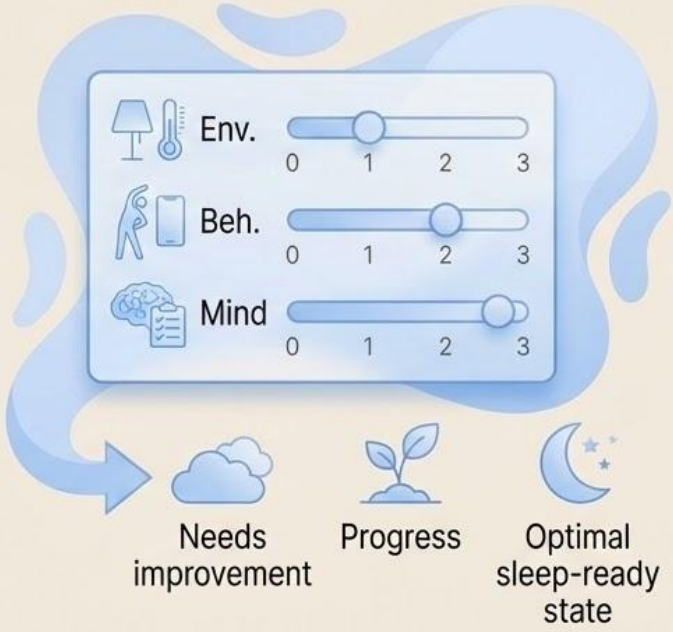

Your Evening Sleep-Readiness Score (0–3 each)

Score these areas:

- Environment: light, noise, temperature
- Behavior: screens, stretching, breathing
- Mind: stress unloaded, tomorrow prepared

Score Guide:

- 0–4 → Needs improvement
- 5–7 → Progress
- 8–9 → Optimal sleep-ready state

Bonus: Track your score nightly to see fast improvements.
