Knee Pillow & Hip Alignment Guide

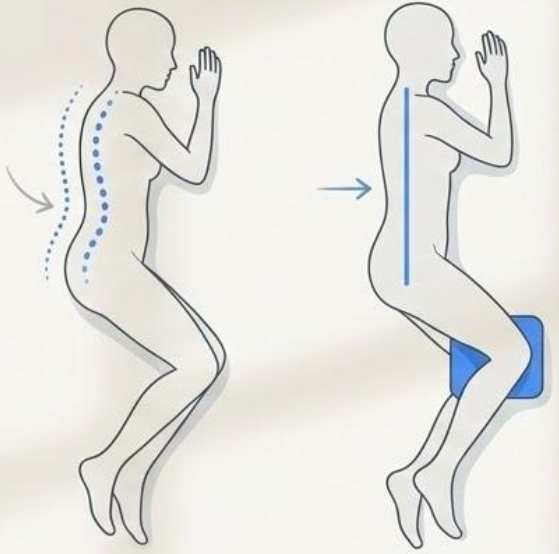

Sleep Supported. Wake Without Hip or Lower–Back Pain.

RiseByNight

Why Knee Support Matters

- Prevents pelvic rotation during side sleeping
- Keeps hips level and neutral
- Reduces lower-back strain
- Relieves pressure in knees & IT band
- Helps maintain full-body alignment all night

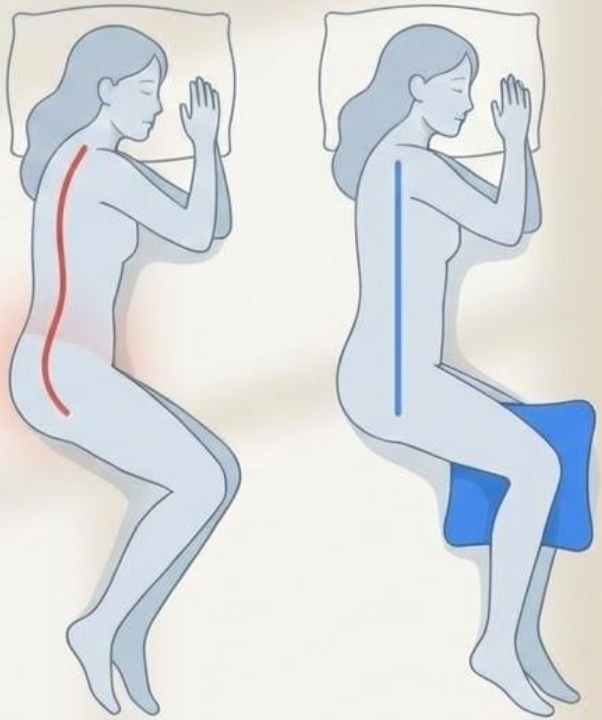

Hip stability = deeper sleep + fewer morning aches.

RiseByNight

The One–Minute Hip Test

- Lie on your side in your usual sleeping position
- Let your top leg relax forward
- Notice if your pelvis twists or lower back tightens
- Now place a knee pillow between your legs
- Observe how your hips level and tension decreases

If you feel instant relief → **you need hip stabilization** at night.

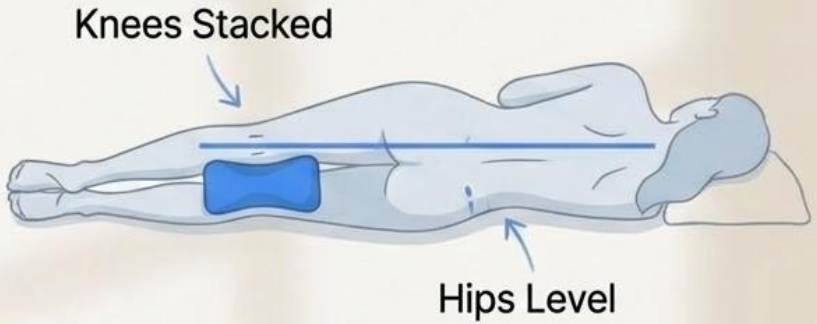

RiseByNight

Correct Knee Pillow Positioning

- Pillow sits between knees, not thighs
- Knees remain stacked or slightly forward
- Hips stay level — no rotation
- Lower back relaxes as tension reduces
- Upper leg no longer collapses forward

Small changes in placement = **big changes** in alignment.

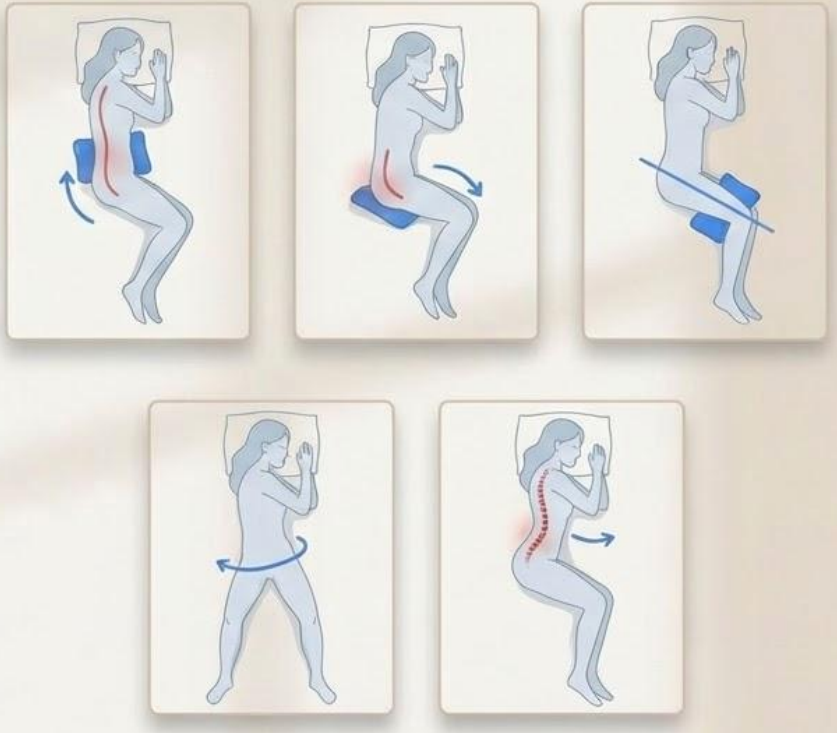

RiseByNight

Common Mistakes to Avoid

- ✕ Pillow too high → hips tilt backward
- ✕ Pillow too low → hips rotate forward
- ✕ Pillow between thighs → no true stabilization
- ✕ Knees separated → pelvis twists
- ✕ Upper body twisting → back strain

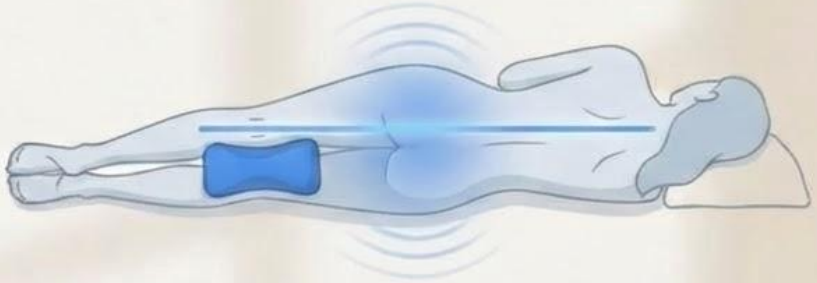

Bonus: A correctly placed knee pillow prevents all 5 mistakes

RiseByNight

Benefits of Correct Hip Alignment

- Reduced morning hip & lower-back pain
- Less tension in glutes and hip flexors
- More stable side-sleeping posture
- Deeper, uninterrupted sleep
- Better overall spinal alignment

Bonus: Align your hips → **recover while you sleep**

RiseByNight

Body–Type Adjustments for Perfect Hip Alignment

- Broad Hips: Use a slightly thicker knee pillow for level pelvis
- Narrow Hips: Use a slimmer pillow to avoid over-lifting
- Tight Hip Flexors: Add extra knee support for neutral alignment
- Hypermobile: Add a hug pillow to avoid upper-body twisting

Bonus: Your hip structure determines the **ideal pillow thickness**. →

RiseByNight

Side-Sleeper Alignment Blueprint

- Head supported by contour of ergonomic pillow
- Shoulder rests naturally into pillow channel
- Knee pillow keeps hips level
- Spine forms a gentle, neutral curve
- Top leg no longer collapses forward

Bonus: This is the gold standard for **pain-free side sleeping.**

RiseByNight

Correcting Hip Rotation While You Sleep

- Knee pillow stops pelvis from twisting
- Glutes relax as rotation decreases
- Lower back muscles stop compensating
- Spine remains aligned throughout the night
- Reduces morning hip & lumbar tension

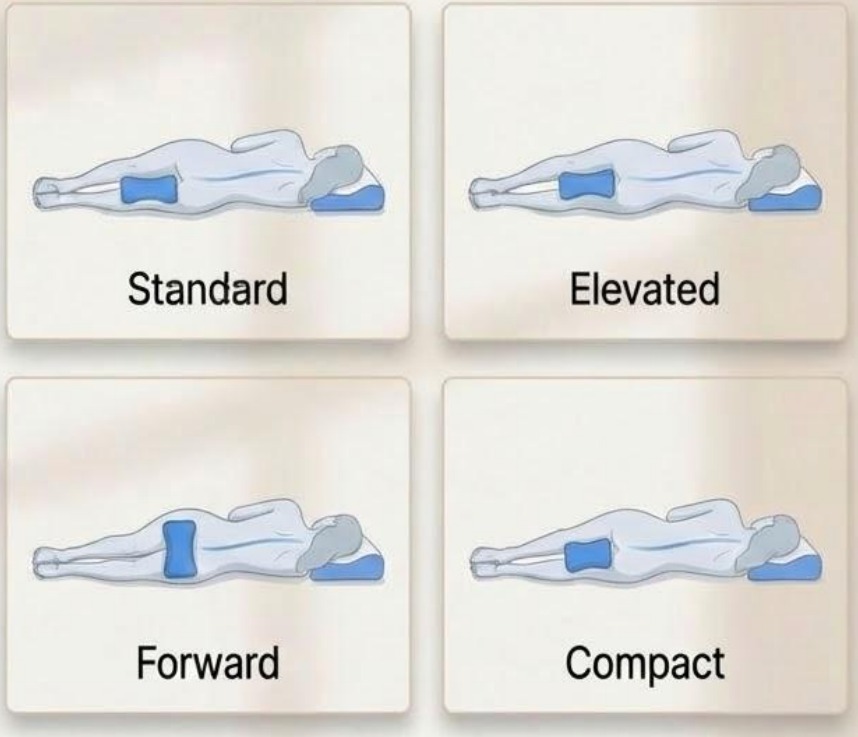

Bonus: Stop the rotation → **stop the nighttime strain.**

RiseByNight

Placement Variations That Work

- **Standard:** Pillow directly between knees
- **Elevated:** Slightly higher for hip flexor tightness
- **Forward:** For preventing leg collapse
- **Compact:** For narrow hips or petite sleepers

Bonus: Customize placement to your hip shape and sleep habits.

RiseByNight

Nighttime Stability Methods

- Hug pillow prevents torso twisting
- Knee pillow stabilizes pelvis
- Light blanket tuck reduces rolling
- Neutral chin position keeps spine aligned
- Keep shoulders relaxed into mattress

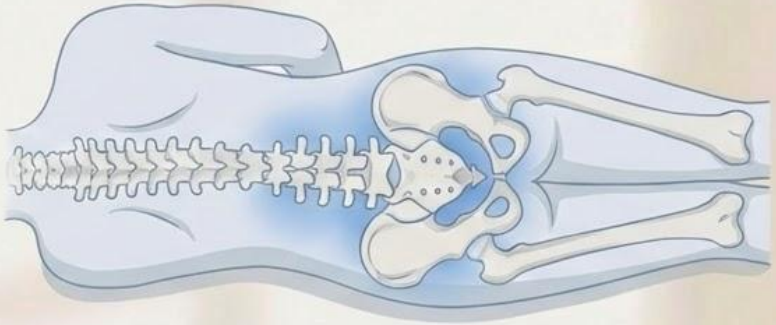

Bonus: Small stability anchors = big improvements in alignment.

RiseByNight

Signs Your Hips Are Aligned Correctly

- ✔ Lower back feels relaxed, not tight
- ✔ Pelvis feels centered, not twisted
- ✔ Knees rest comfortably together or supported
- ✔ No pulling sensation in glutes or hip flexors
- ✔ Morning discomfort noticeably reduced

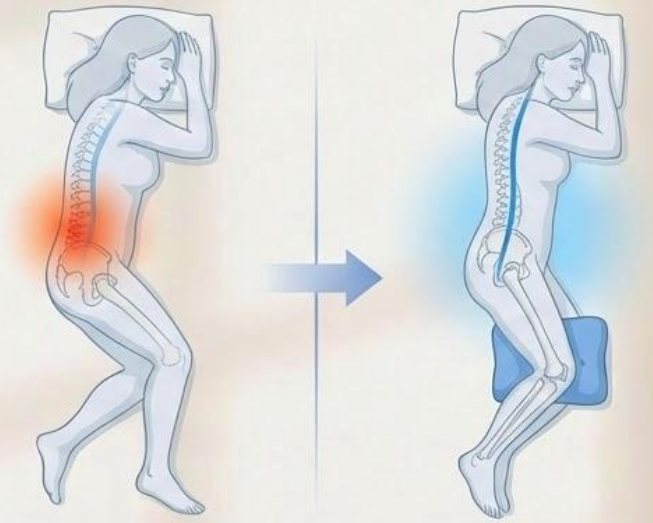

Bonus: Proper hip alignment transforms the way your body recovers at night.

RiseByNight

The One-Minute Hip Alignment Test (Visual Guide)

- Lie on your side in your natural sleep position
- Let your top leg relax forward
- Feel if your pelvis twists or lower back tightens
- Place a knee pillow between your knees
- Notice how your hips level and tension releases

Bonus: If your body relaxes instantly → your hips need nighttime stabilization.

Your Hip Alignment Transformation

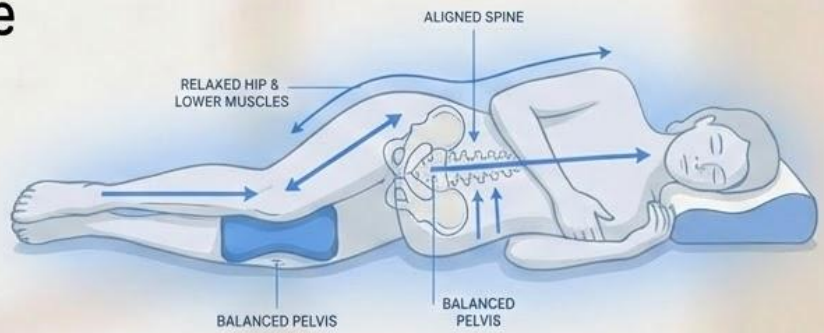

- **Night 1:** Immediate reduction in leg collapse
- **Week 1:** Noticeable decrease in morning tension
- **Week 2:** More stable side-sleeping posture
- **Week 4:** Deep, uninterrupted sleep with neutral hips
- **Long Term:** Less strain, better recovery, improved posture

Bonus: Small nightly improvements create long-term transformation.

Knee Pillow Positioning Blueprint

- Keeps knees aligned to prevent hip rotation
- Supports pelvis for balanced posture
- Reduces lower-back muscle activation
- Stabilizes side-sleeping posture
- Enhances comfort & deep sleep quality

Bonus: Blueprint precision → predictable sleep alignment.
