Neck Pain Alignment Guide

Wake Up Without Pain.
Sleep In True Alignment.

RiseByNight

Why Neck Pain Happens While You Sleep

- Misalignment forces neck muscles to stay active overnight

- Incorrect pillow height bends the cervical spine

- Collapsing foam breaks alignment mid-night

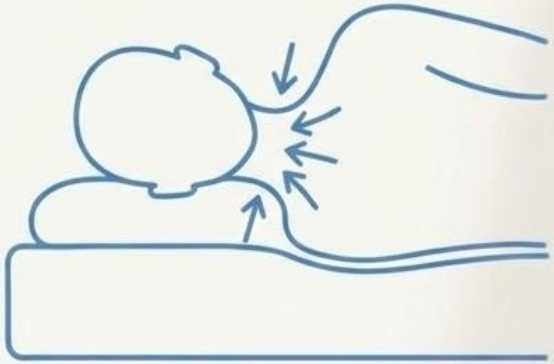

- Shoulder compression → tension & morning stiffness

RiseByNight

The Neck–Shoulder Gap Explained

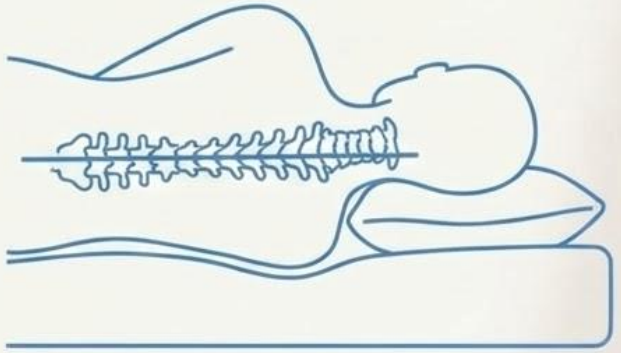

- Side sleepers naturally create a gap under the neck
- Unfilled gap causes strain + nerve compression
- Leads to stiffness, headaches, restless sleep
- Your pillow must match your shoulder height

RiseByNight

Correct Side–Sleeping Alignment

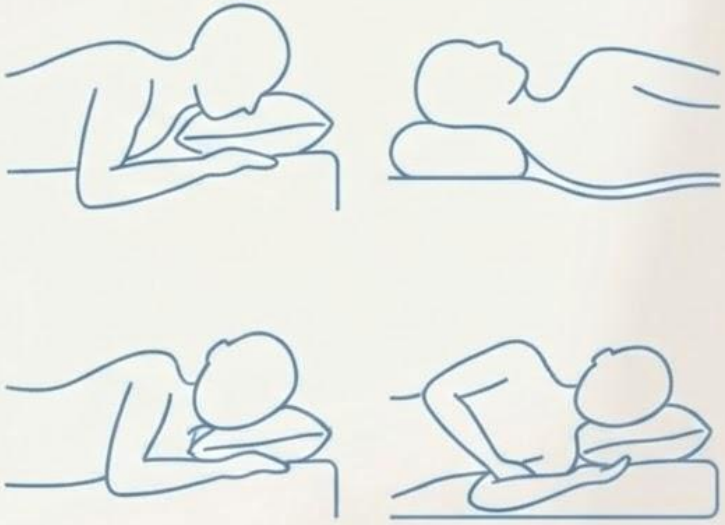

- Spine should form a straight horizontal line
- Neck supported at the same height as spine
- Shoulder sinks naturally into mattress
- Chin stays neutral — no tilting

RiseByNight

Common Alignment Mistakes

- ✕ Head tilts down → neck compression
- ✕ Head tilts up → overstretched spine
- ✕ Shoulder collapses → nerve pressure
- ✕ Torso twist → morning stiffness

RiseByNight

How Proper Ergonomics Reduce Neck Pain

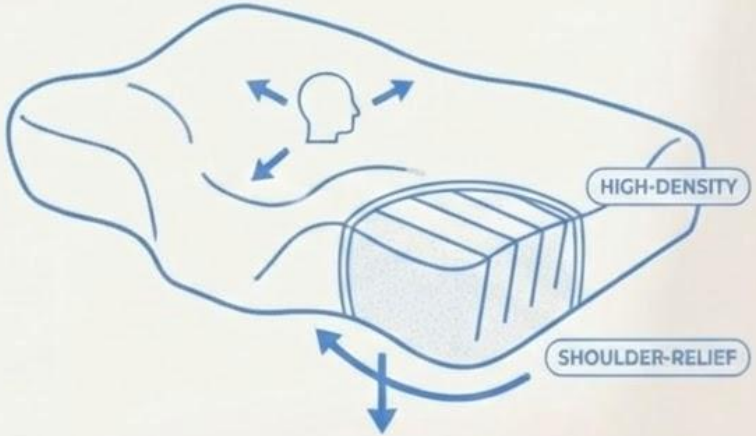

- Supports the neck–shoulder gap perfectly
- Keeps the cervical spine neutral all night
- Prevents rolling into harmful angles
- Reduces micro-awakenings caused by discomfort

RiseByNight

The RiseByNight Contour Advantage

- 2-in-1 contour for side & back sleepers
- Designed to correct desk-worker posture strain
- High-density foam that maintains support all night
- Shoulder-relief zone minimizes compression

Shoulder-Relief Zone

RiseByNight

How to Position Yourself (Side Sleeping)

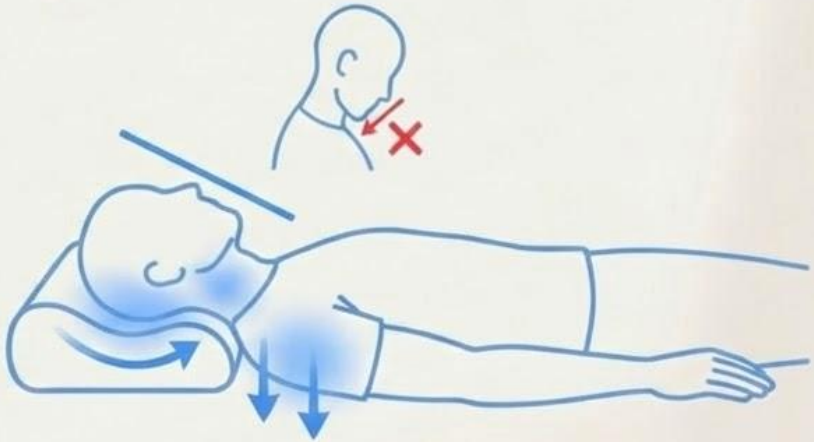

- Place contour directly under your neck
- Shoulder slightly forward, not tucked under
- Chin stays neutral
- Knees stacked — add knee pillow if needed
- Hug a pillow to prevent upper-back rotation

RiseByNight

How to Position Yourself (Back Sleeping)

- Rest neck on lower contour
- Head slightly lower than neck support
- Avoid chin-toward-chest posture
- Keep shoulders relaxed, not lifted
- Hands at sides or gently on torso

RiseByNight

The 3–Minute Alignment Test

- ✓ Neck feels supported
- ✓ Head feels weightless
- ✓ Shoulders naturally relax
- ✓ Jaw and breathing soften

RiseByNight

Your Morning Pain Reduction Timeline

Nights 1–3:
Your body begins adapting to correct alignment

Nights 4–7:
Neck & shoulder tension decreases noticeably

Week 2:
Deeper sleep + fewer micro-awakenings

Day 30:
Full posture adaptation for lasting pain relief

RiseByNight

Night Routine for Reducing Neck Pain

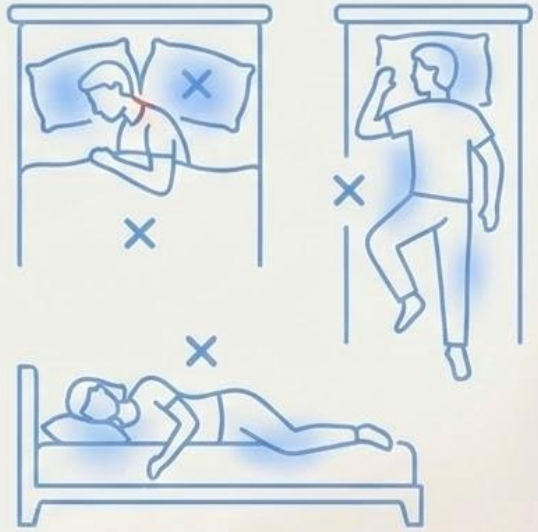

- ✓ 30-second chin-tuck stretch
- ✓ Gentle shoulder rolls
- ✓ Deep breathing for 1 minute
- ✓ Align pillow before settling
- ✓ Avoid stacking multiple pillows

RiseByNight

Mistakes That Cause Night Pain

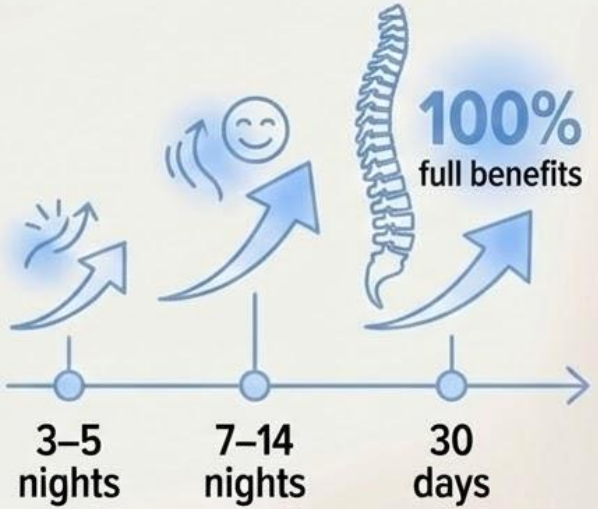

- ✕ Using two pillows
- ✕ Sleeping half on your stomach
- ✕ Twisting your torso while side sleeping
- ✕ Using old, collapsing foam
- ✕ Chin tucked toward chest

RiseByNight

When to Expect Real Results

- ✓ The first improvements appear after 3–5 nights
- ✓ Significant relief typically in 7–14 nights
- ✓ Full alignment benefits in 30 days
- ✓ Consistency matters more than intensity

RiseByNight

Track Your Neck Pain Progress

- ✓ Rate morning pain (0–10)
- ✓ Note where tension occurs
- ✓ Track sleep interruptions
- ✓ Record pillow comfort nightly
- ✓ Monitoring progress boosts results
